

# Accountant in Business (AB)/FAB September 2018 to August 2019

## The structure of the syllabus and Study guide

This syllabus and study guide are designed to help with teaching and learning and is intended to provide detailed information on what could be assessed in any examination session.

## Overall aim of the syllabus

This explains briefly the overall objective of the syllabus and indicates in the broadest sense the capabilities to be developed within the examination.

## Relational diagram linking Accountant in Business (AB)/FAB with other ACCA exams

This diagram shows direct and indirect links between this examination and other examinations which precede or follow it. Some examinations are directly underpinned by others. It indicates where you are expected to have underpinning knowledge and where it would be useful to review previous learning before undertaking study.

## Main capabilities

The aim of the syllabus is broken down into several main capabilities which divide the syllabus and study guide into discrete sections.

## Relational diagram of main capabilities

This diagram illustrates the flows and links between the main capabilities (sections) of the syllabus and should be used as an aid to planning teaching and learning in a structured way.

## Relational diagram of main capabilities

This diagram illustrates the flows and links between the main capabilities (sections) of the syllabus and should be used as an aid to planning teaching and learning in a structured way.

## Syllabus rationale

This is a narrative explaining how the syllabus is

structured and how the main capabilities or sections of the syllabus are linked. The rationale also explains in further detail what the examination intends to assess and how.

## Detailed syllabus

This shows the breakdown of the main capabilities (sections) of the syllabus into subject areas. This is the blueprint for the detailed study guide.

## Approach to examining the syllabus

This section briefly explains the structure of the examination and how it is assessed.

## Study Guide

This is the main document that students and education and content providers should use as the basis of their studies, instruction and materials. Examinations will be based on the detail of the study guide which comprehensively identifies what could be assessed within any examination. The study guide is a precise reflection and breakdown of the syllabus. It is divided into sections based on the main capabilities identified in the syllabus. These sections are divided into subject areas which relate to the sub-capabilities included in the detailed syllabus. Subject areas are broken down into sub-headings which describe the detailed outcomes that could be assessed in examinations. These outcomes indicate what exams may require students to demonstrate, and the broad intellectual level at which these may need to be demonstrated (\*see intellectual levels below).

## Intellectual levels

The syllabus is designed to progressively broaden and deepen the knowledge, skills and professional values demonstrated by the student on their way through the qualification.

The specific capabilities within the detailed syllabuses and study guides are assessed at one of three intellectual or cognitive levels:

Level 1: Knowledge and comprehension

Level 2: Application and analysis

Level 3: Synthesis and evaluation

Very broadly, these intellectual levels relate to the three cognitive levels at which the Applied Knowledge, the Applied Skills and the Strategic

Professional exams are assessed.

Each subject area in the detailed study guide included in this document is given a 1, 2, or 3 superscript, denoting intellectual level, marked at the end of each relevant line. This gives an indication of the intellectual depth at which an area could be assessed within the examination. However, while level 1 broadly equates with Applied Knowledge, level 2 equates to Applied Skills and level 3 to Strategic Professional, some lower level skills can continue to be assessed as the student progresses through each level. This reflects that at each stage of study there will be a requirement to broaden, as well as deepen capabilities. It is also possible that occasionally some higher level capabilities may be assessed at lower levels.

### **Learning hours and education recognition**

The ACCA qualification does not prescribe or recommend any particular number of learning hours for examinations because study and learning patterns and styles vary greatly between people and organisations. This also recognises the wide diversity of personal, professional and educational circumstances in which ACCA students find themselves.

As a member of the International Federation of Accountants, ACCA seeks to enhance the education recognition of its qualification on both national and international education frameworks, and with educational authorities and partners globally. In doing so, ACCA aims to ensure that its qualifications are recognized and valued by governments, regulatory authorities and employers across all sectors. To this end, ACCA qualifications are currently recognized on the education frameworks in several countries. Please refer to your national education framework regulator for further information about recognition.

Each syllabus contains between 20 and 35 main subject area headings depending on the nature of the subject and how these areas have been broken down.

### **Guide to ACCA examination structure**

The structure of examinations varies within and between levels.

The Applied Knowledge examinations contain 100% compulsory questions to encourage candidates to

study across the breadth of each syllabus.

These are assessed by a two-hour computer based examination

The *Corporate and Business Law* exam is a two-hour computer-based objective test examination for English and Global, and available as a paper based version for all variants.

The other Applied Skills examinations (PM, TX-UK, FR, AA, and FM) contain a mix of objective and longer type questions with a duration of three hours for 100 marks; these questions directly contribute towards the candidate result. These exams are available in computer-based and paper-based formats. Prior to the start of each exam there will be time allocated for students to be informed of the exam instructions.

### **Computer-based exams**

For the Applied Skills (PM, TX-UK, FR, AA and FM) computer-based exams candidates will be delivered an extra 10 marks of objective test content (either five single OT questions or five OT questions based around a single scenario), for which candidates are given an extra 20 minutes. These questions are included to ensure fairness, reliability and security of exams. These questions do not directly contribute towards the candidate's score. Candidates will not be able to differentiate between the questions that contribute to the result and those that do not. All questions have been subject to ACCA's regulatory approved quality assurance process.

The total exam time is therefore 3 hours and 20 minutes. Prior to the start of the exam candidates are given an extra 10 minutes to read the exam instructions.

### **Paper-based exams**

For paper-based exams 15 minutes are added to the three hours to reflect the manual effort required as compared to computer-based exams. All paper-based and computer-based questions have been subject to the same quality assurance process. There will be time awarded by the invigilator to read the exam instructions.

*Strategic Business Leader* is ACCA's case study examination at the Strategic Professional level and is examined as a closed book exam of four hours, including reading, planning and reflection time which can be used flexibly within the examination.

There is no pre-seen information and all exam related material, including case information and exhibits are available within the examination. Strategic Business Leader is an exam based on one main business scenario which involves candidates completing several tasks within which additional material may be introduced. All questions are compulsory and each examination will contain a total of 80 technical marks and 20 Professional Skills marks. The detail of the structure of this exam is described in the Strategic Business Leader syllabus and study guide document.

The other Strategic Professional exams are all of three hours and 15 minutes duration. All contain two Sections and all questions are compulsory. These exams all contain four professional marks. The detail of the structure of each of these exams is described in the individual syllabus and study guide documents.

ACCA encourages students to take time to read questions carefully and to plan answers but once the exam time has started, there are no additional restrictions as to when candidates may start writing in their answer books.

Time should be taken to ensure that all the information and exam requirements are properly read and understood.

The pass mark for all ACCA Qualification examinations is 50%.

## Guide to ACCA examination assessment

ACCA reserves the right to examine anything contained within any study guide within any examination session. This includes knowledge, techniques, principles, theories, and concepts as specified.

For the financial accounting, audit and assurance law and tax exams, except where indicated otherwise, ACCA will publish *examinable documents* once a year to indicate exactly what regulations and legislation could potentially be assessed within identified examination sessions.

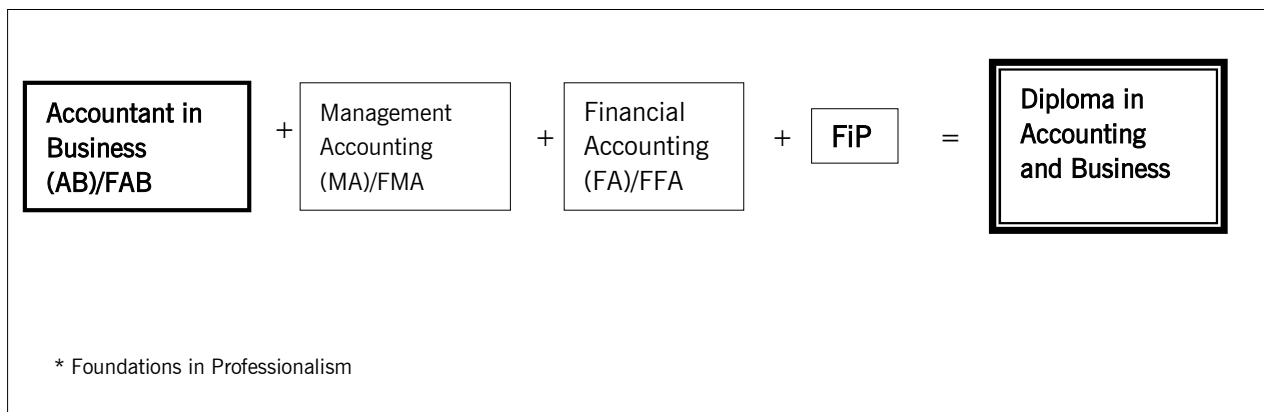

For examinations regulation *issued* or legislation *passed* on or before 31 August annually, will be examinable from 1 September of the following year to 31 August of the year after that. Please refer to the examinable documents for the exam (where relevant) for further information.

Regulation issued or legislation passed in accordance with the above dates may be examinable even if the *effective* date is in the future. The term issued or passed relates to when regulation or legislation has been formally approved. The term effective relates to when regulation or legislation must be applied to entity transactions and business practices.

The study guide offers more detailed guidance on the depth and level at which the examinable documents will be examined. The study guide should therefore be read in conjunction with the examinable documents list.

## Qualification structure

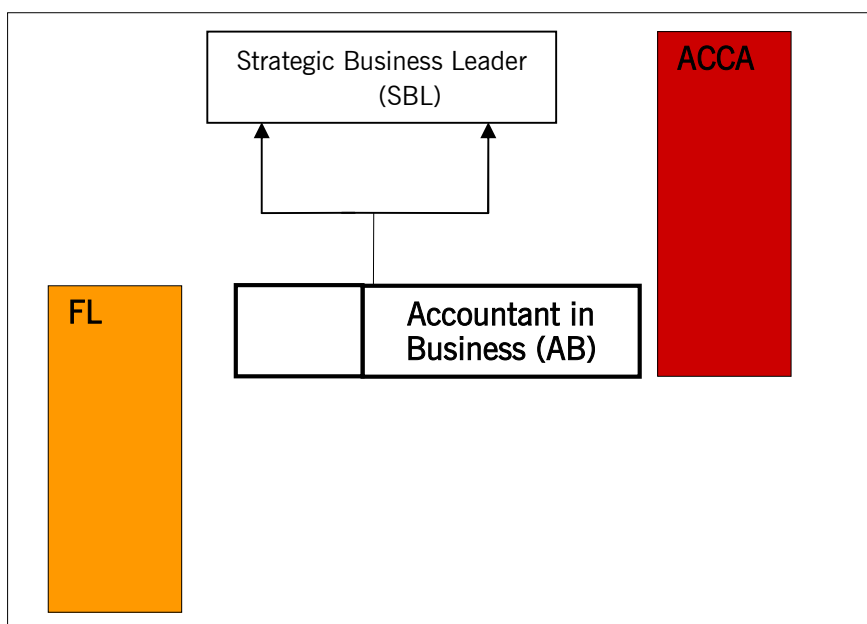

The qualification structure requires candidates who wish to be awarded the Diploma in Accounting and Business to pass the *Accountant in Business (AB)/FAB*, *Management Accounting (MA)/FMA* and the *Financial Accounting (FA)/FFA* examinations and successfully complete the Foundations in Professionalism (FiP) module.

## Syllabus structure

The Foundations Level suite of qualifications is designed so that a student can progress through three discrete levels; Introductory Certificate level, Intermediate Certificate level and the Diploma level.

Students are recommended to enter Foundations Level at the level which is most appropriate to their needs and to take examinations in order, but this is not a mandatory requirement

# Accountant in Business (AB)/FAB Syllabus and Study Guide

## AIM

To introduce knowledge and understanding of the business and its environment and the influence this has on how organisations are structured and on the role of the accounting and other key business functions in contributing to the efficient, effective and ethical management and development of an organisation and its people and systems.

## RATIONALE

The syllabus *Accountant in Business (AB)/FAB* introduces students who may not have a business background, to the business, which as an entity is made up of people and systems which interact with the environment and with each other. The syllabus begins with examining the purpose and types of business which exist, the key stakeholders and the rights and responsibilities that businesses have in connection with them, exploring the external influences that affect the business in its environment, including economic, legal, social and technological factors. The syllabus then examines the structure and functions of business, focusing on corporate governance and the specific accounting related roles in this process, particularly in financial reporting, assurance, control and compliance. The syllabus then introduces key leadership, management and people issues such as effective individual and team behaviour, motivation and personal effectiveness.

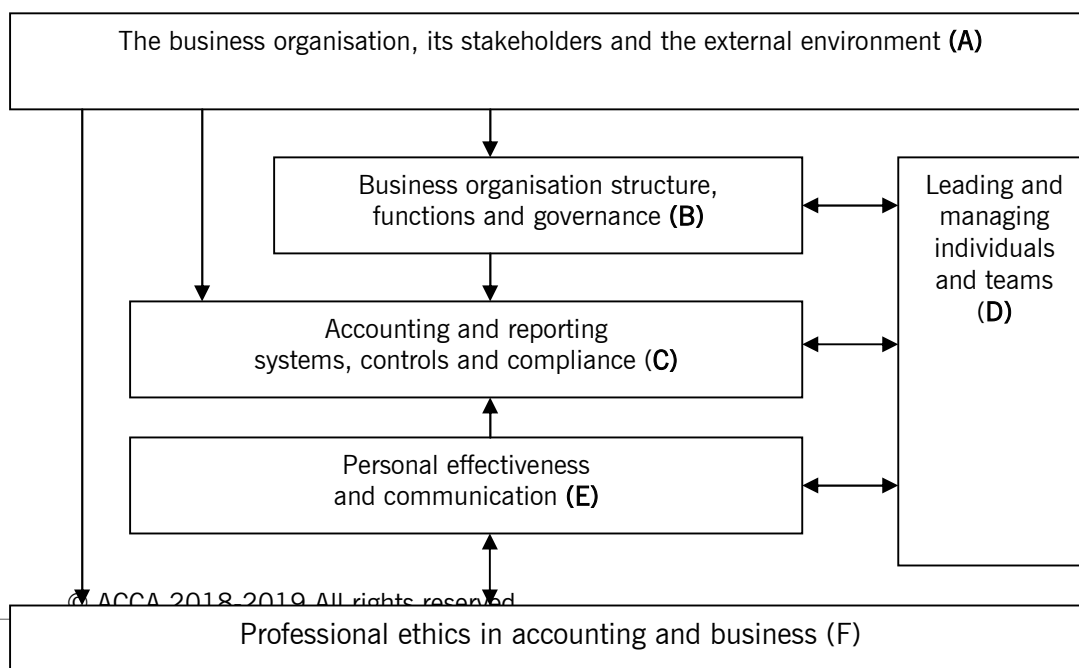

The final section of the syllabus examines how behaviour at all levels within business should be underpinned by accepted professional ethics and professional values.

## MAIN CAPABILITIES

On successful completion of this paper, candidates should be able to:

- A** Understand the purpose and types of businesses and how they interact with key stakeholders and the external environment.
- B** Understand business organisation structure, functions and the role of corporate governance
- C** Recognise the function of accountancy and audit in communicating, reporting and assuring financial information and in effective financial control and compliance
- D** Recognise the principles of authority and leadership and how teams and individuals are recruited, managed, motivated and developed.
- E** Understand the importance of personal effectiveness as the basis for effective team and organisational behaviour.
- F** Recognise that all aspects of business and finance should be conducted in a manner which complies with and is in the spirit of accepted professional ethics and professional values
